## **SECTION II – BACKGROUND**

### **A. Air District Overview**

The Bay Area Air Quality Management District (Air District) was created by the California Legislature in 1955 as the first regional agency to deal with air pollution in California. The Air District jurisdiction includes Alameda, Contra Costa, Marin, Napa, Santa Clara, San Francisco, San Mateo, southwestern Solano, and southern Sonoma counties.

The State Legislature originally gave the Air District the authority to regulate stationary sources of air pollution, such as factories, oil refineries, chemical plants, gasoline stations, and agricultural burning. With more recent legislation, the Air District was granted authority to enact certain transportation and mobile source measures.

The Air District is governed by a twenty-three member Board of Directors, consisting of elected officials, including county supervisors, mayors, and city council members. The chief executive officer of the Air District is the Air Pollution Control Officer (APCO), a position currently held by Jack Broadbent.

The Air District operates a headquarters office at 939 Ellis Street in San Francisco. The building is a seven-story office building with a small lobby and lobby desk. Although other Air District employees work out of office spaces elsewhere within the nine-county Bay Area, this RFP seeks bids for security services only at the 939 Ellis Street headquarters building.
