AGENDA: 5

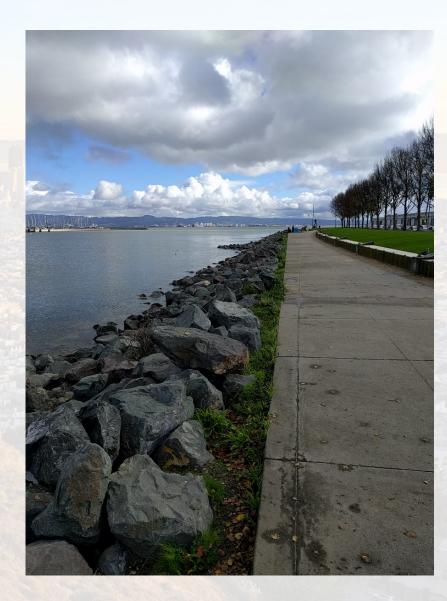

## Bay Area Regional Collaborative (BARC) Update

### Executive Committee Meeting November 19, 2018

### **Key Program Areas**

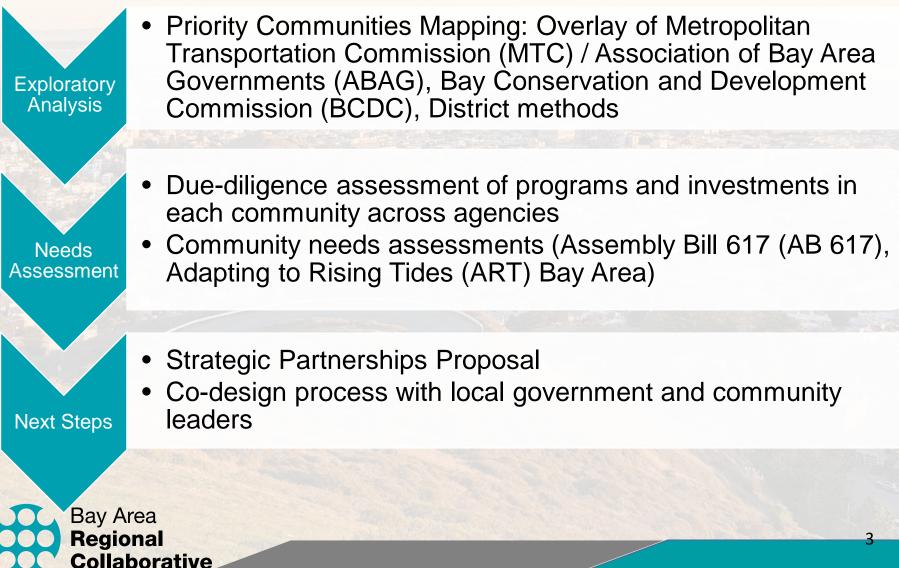

- Carbon Free Future
- Level Playing Field
  - Resilient Bay Area
    Senate Bill 1 (SB 1)
    Adaptation Planning
    Resilient by Design Assessment

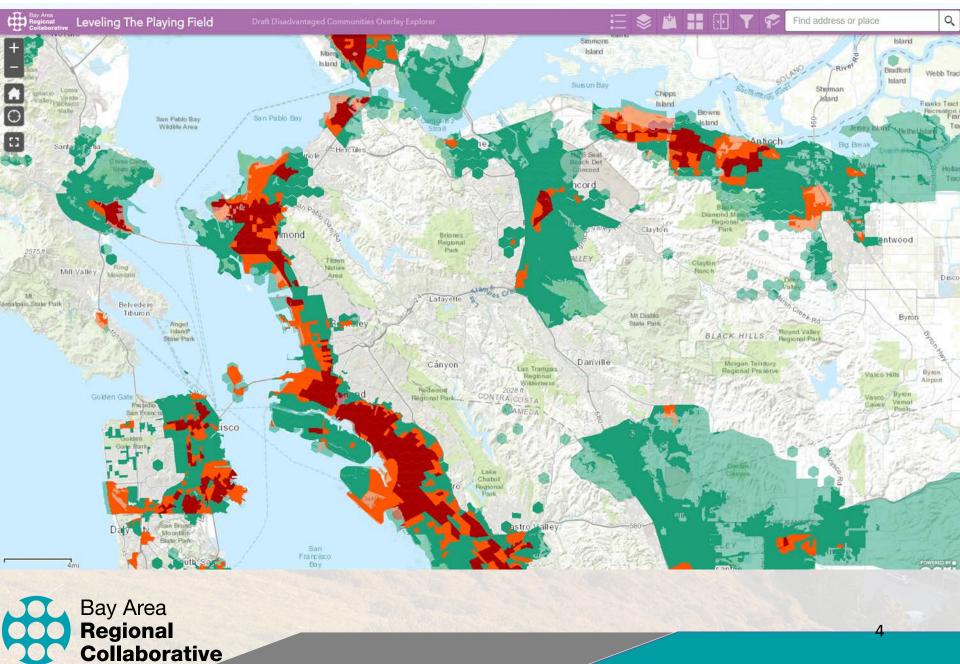

### Level Playing Field – Program Development

# **Goal:** Coordinated support for capacity building and measurably improved outcomes in Bay Area's priority communities

### Level Playing Field: Priority Communities Mapping

### Combining Mitigation & Adaptation Approaches Caltrans SB 1 Adaptation Planning Grants

Project Management Team: BARC, BCDC, MTC/ABAG, State Coastal Conservancy, Caltrans

South San Francisco Hassel+ North Bay/State Route 37 Common Ground East Palo Alto/Dumbarton Bridge Approach AECOM

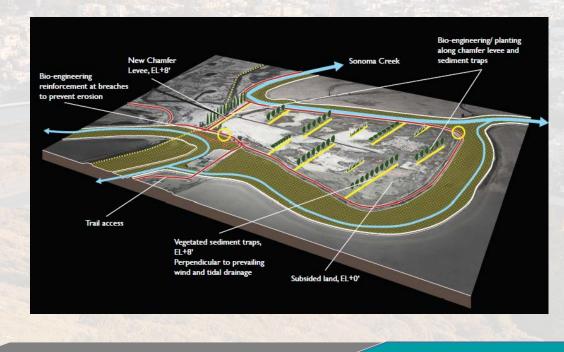

### North Bay, State Route (SR-37) Public Access

**Objective:** Create equitable and resilient multimodal public access along SR-37 corridor and in San Pablo Bay

### Key activities include:

- Develop strategic adaptation interventions to expand public access to the Bay Trail
- Coordinate trail and access options with near and long-term SR-37 improvements

### South San Francisco, Colma Creek

**Objective:** To design for improved mobility and equitable access to the CalTrain and BayTrail while reducing risks to current and future flooding.

### Key activities include:

- Mitigate flooding associated with Colma Creek
- Develop three adaptation design proposals including hydraulic and transport modeling
- Expand Resilient South City' public engagement

### East Palo Alto/Dumbarton Bridge Resilience Study

**Objective:** Identify adaptation strategies to protect the City of East Palo Alto and the Dumbarton Bridge western approach.

#### Key activities include:

- Stakeholder engagement with East Palo Alto community and relevant asset managers
- Identification of near-term and long term adaptation strategies
- Implementation plan that identifies a path forward for selected adaptation strategies

Mean Higher High Water (MHHW) + 36" Sea Level Rise

### Resilient by Design (RbD) Bay Area Challenge Assessment

- Consensus Building Institute (CBI) conducted an assessment of the RbD process and outcomes.
- **Purpose:** Assess impacts, lessons learned and potential next steps.
- Methodology: 28 interviews plus informal conversations.
- **Participants:** Agency, nonprofit, community, elected officials and design team representatives.

"We can design coastlines and resilient landscapes differently, and design can play a leadership role to formulate and develop strong narratives for projects needed to meet the challenges of the 21st century." - Designer

### Impact of the Challenge

- Brought resilience to the forefront on a regional scale.
- Created opportunity to plan big, for long-term.
- Design can play an aspirational, creative role in a frightful conversation.

"Retreating doesn't have to look like failure. The designs provided visualizations of something to achieve as opposed to something to avoid."

### **New, Integrated Ideas**

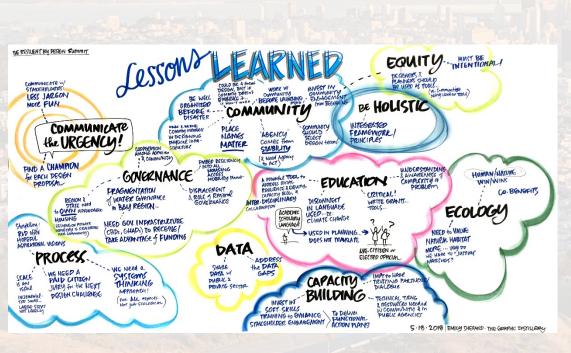

Resilience depends on integrating social equity, ecosystems, and the built environment to manage sea level rise, transportation, housing, the environment, and other vulnerabilities.

International perspectives and attention brought new ideas to the Bay Area.

"We have to solve for multiple things...we should fund projects that have multi-system and interdisciplinary approach."

### **Lessons Learned for Future Challenges**

Bay Area Regional

Collaborative

- Social equity is key, and relationship-building with communities must start day one.
- Structure & timeline did not support meaningful engagement.
- Academic partnership
  - provides insights and builds capacity for future.
- Scope of some projects was too broad.
- Allow for regional strategies or team learning across sites.

### **Opportunities for Advancing Design Elements**

- Connect regional resiliency with local issues.
- Challenges / Hurdles
  - Funding will be the biggest challenge.
  - Implementation may take major multijurisdictional coordination and/or modification
  - All the designs lacked an articulation of the first steps for how to start down the path towards implementing the bigger vision.
  - Residual distrust remain from the Challenge for some stakeholders.

### Interviewees: What's Needed Going Forward

We're not finished. Need champion(s) to advance elements of the designs.

- Build on existing initiatives and relationships.
- Specific list of potential elements to advance.
- Short-, mid-, and long-term implementation.
- Maintain / update and make accessible resiliency-related information.

"The majority of this work started by the Challenge will fade away without a champion. We are going to need technical support, fundraising, regional support, and advocacy if we are going to be successful implementing projects."- Local Agency

## **THANK YOU!**

### PRODUCTION SYSTEM OFFICE STATUS UPDATE

Blair L Adams Executive Committee Meeting November 19, 2018

### PRODUCTION SYSTEM OFFICE: AGENDA

### PRODUCTION SYSTEM OFFICE: SCOPE OF SERVICES

**Public Websites** 

Data Management and Analytics

Permitting and Compliance System

### PUBLIC WEBSITES: 2018 ACCOMPLISHMENTS

### PERMITTING AND COMPLIANCE SYSTEM: THREE DEVELOPMENT TRACKS

Enforcement and Compliance

**Engineering (Common Facilities)** 

Engineering (Major Facilities)

### PERMITTING AND COMPLIANCE SYSTEM: CURRENT PRODUCTION FEATURES

Financial Integration	Gas Stations	Dry Cleaners	Autobody Shops
Char-broilers	Mobile Refinishing	Graphic Arts	Small Boilers
Agricultural Diesel Engines	Internal Combustion Engines	Public Complaints	Wood Smoke
Grants	Asbestos	Facility Inspections	General Investigations

### PERMITTING AND COMPLIANCE SYSTEM: REMAINING GOALS FOR 2018

**Payment System Integration** 

**Emission Inventory Report** 

Fee Calculations

**Emission Calculations** 

### PERMITTING AND COMPLIANCE SYSTEM: DEMONSTRATION

Facility Inspection Module

Major Facility Portal

### PERMITTING AND COMPLIANCE SYSTEM: DEMONSTRATION SUMMARY

Unified Access to Information

Improved Collaboration

Augmented Development Resources

Parallel Development Tracks

# PERMITTING AND COMPLIANCE SYSTEM: 2019 GOALS

**Refinery Renewals** 

**Enforcement Actions** 

**Complaint Processing** 

**Mutual Settlement** 

Health Risk Assessments (11-18)

Permits Applications (Non-Title V Sources)

### PUBLIC WEBSITES: 2019 GOALS

**Content Management System Upgrade** 

**Dynamic Map Improvements** 

Air Quality Visualization

**Metrology Visualization** 

Spare the Air Microsite

### PERMITTING AND COMPLIANCE SYSTEM: SCALED DEVELOPMENT RESOURCES

Request for Qualifications: 14 Submittals

Major Facility Portal Task Order: 5 Bids

New Development Team: IdeaBlade

Notable Progress on Major Facility

### PRODUCTION SYSTEM OFFICE: CONTRACTOR TEAM

Vendor	Service Description	
C&G Technology	Software Design and testing services for the	
Services	permitting and compliance system.	
Clearsparc	Software architecture, design, development, build and release management services for the permitting and compliance system.	
Cylogy	Backend website content management system integration, customization and infrastructure support.	
ldeablade	Software design, development, build and release management services for the major facility portal.	
ITDependz	Business analysis and user experience services for the permitting and compliance system.	
Malinda Lai	Website content management and infrastructure support.	
Trinity Technology Group	Legacy system management and data transfer services. Business analysis, database rules and logic implementation.	

### PERMITTING AND COMPLIANCE SYSTEM: STAFF RECOMMENDATION

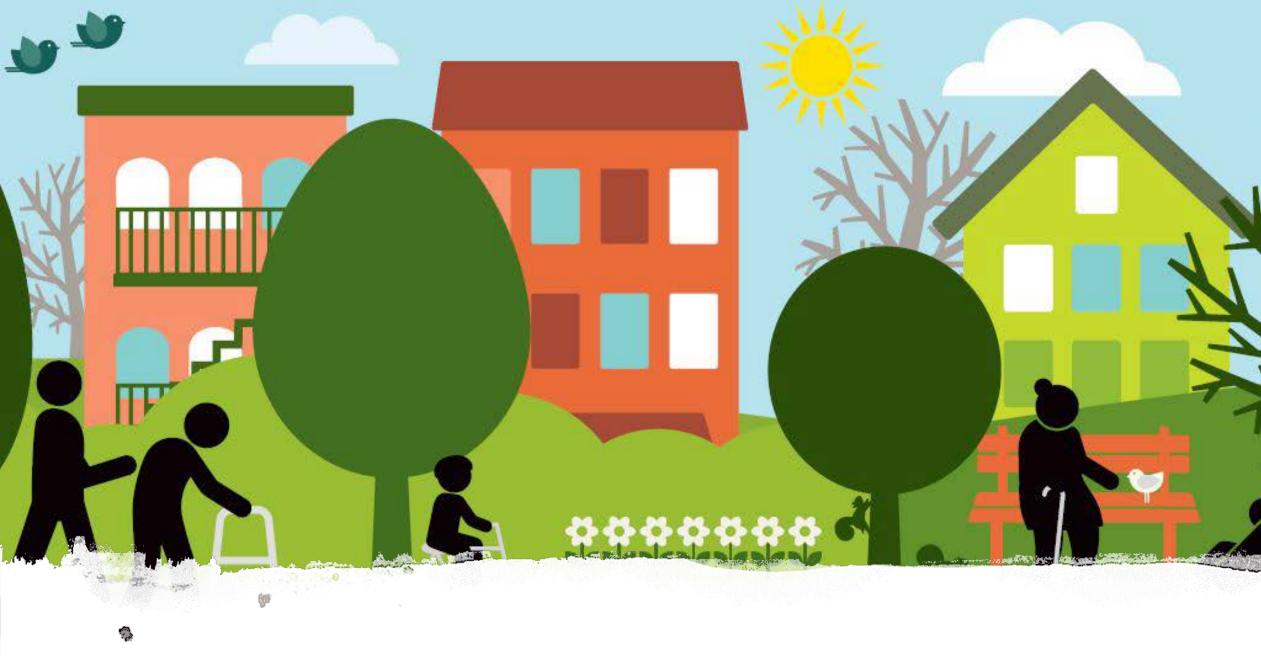

Recommend the Board of Directors:

- Approve contract amendments in the amount of \$1,859,439 as shown in Table
   1 of the Staff Report; and
- 2. Authorize the Executive Officer/APCO to execute contract amendments.
