# Technology Implementation Office Steering Committee Composition

Technology Implementation Office Steering Committee Meeting  
October 22, 2018

Ranyee Chiang  
Technology Implementation Officer

# Technology Implementation Office: Tackle Barriers for Emerging Climate Technologies

Connect Emerging Technologies

and

Customers

- Evaluate and share benefits and costs of emerging technologies
- Educate customers
- Loans, loan guarantees, grants and financing partnerships

# Technology Focus Areas

Connect **Emerging Technologies**

and

**Customers**

**Industrial Technologies**

**Light Duty Electric Vehicle Incentives**

**EV Partnerships and Outreach**

# TIO Steering Committee Advises Air District Staff

- Facilitate vision and strategy development
- Support execution of the strategy
- Provide recommendations on technologies, market readiness, emissions reduction impacts
- Raise profile and visibility of office and identify new partnership opportunities

# Steering Committee Composition

- Additional expertise may be valuable for
  - Expanding and increasing impact of incentive programs
  - Identifying new public and private sector financing partners
  - Addressing community and equity goals
- Seeking input on priority candidates for up to 3 additional TIO Steering Committee members

# Steering Committee Composition (cont'd)

- Next Steps:
  - Air District staff invite candidates based on priority list
  - Continue with invitations until 3 members confirm that they will join or priority list is exhausted
  - For candidates with limited time, option of informal or non-voting members of Steering Committee

# Candidates

**Orson Aguilar**

**President, Greenlining Institute**

equity

NGO

**Catha Groot**

**Principal, Radicle Impact**

cleantech

private

finance

startups

**Michael Montgomery**

**Assistant Director Water Division, EPA Region 9**

environment

government

finance

**Erin Kilmer Neel**

**Chief Impact Officer, Beneficial State Foundation**

equity

foundation

finance

**Marilyn Waite**

**Climate Finance Officer, Hewlett Foundation**

environment

foundation

finance

**Renee Webster-Hawkins**

**Executive Director, CA Pollution Control Financing Authority**

environment

government

finance

small business

**Jetta Wong**

**Senior Advisor, Los Angeles Clean Tech Incubator**

# Technology Assessment and Outreach

Technology Implementation Office Steering Committee Meeting  
October 22, 2018

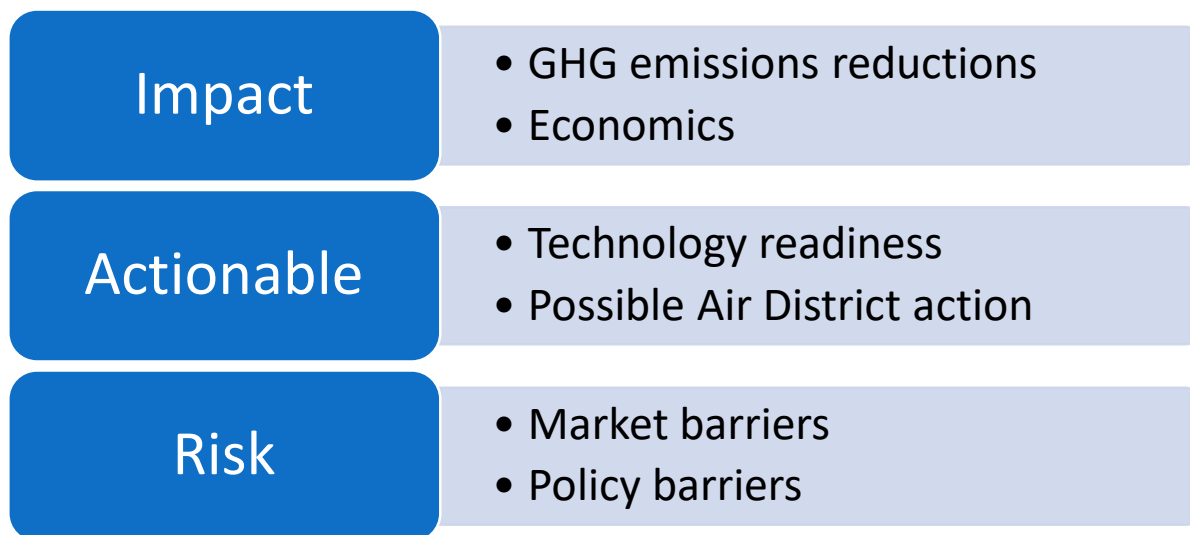

Brian Butler  
Staff Specialist

# Climate Technology Review

*Technology Implementation Office (TIO) evaluated 188 emerging technologies:*

**Sectors:** Agriculture, Buildings, Cement, Combined Heat and Power/Power Generation, Iron and Steel, Petroleum, Semiconductors, Waste

# Actions to accelerate technologies

For each sector, identified top three technologies and recommended most suitable Air District action:

**Regulate**

**Incentivize**

**Educate**

# Regulate: An Example Measure

## Boiler maintenance in petroleum systems

- Boiler emissions come from fuel use and the boiled substances themselves
- Reducing leaks and buildup on burners can achieve 10% fuel savings
- No new installation cost; recurring maintenance cost but can be positive return on investment
- Air District could make boiler maintenance a permit condition

# Educate: An Example Measure

## Low-emissivity window coatings for commercial buildings

- These coatings reflect heat and can reduce HVAC loads by 21%
- Can be manufactured in new windows or applied as retrofit
- Along with other building measures, may be relevant to stakeholders who can regulate or incentivize new building technologies

# Incentivize: An Example Technology

## Battery backup and hydrogen fuel cells to replace diesel generators

- Higher capital costs than diesel generators but lower operating costs, less maintenance, and zero emissions
- Emerging technologies using second-life batteries
- Large base of potential customers
- Key technology solutions for Diesel Free commitments

# Incentivize: An Example Technology

## Shortcut nitrogen removal (“anammox”) for wastewater treatment

- Bacterial process that eliminates the need for aeration and lowers sludge volumes
- Sharply reduces energy use and can result in net consumption of CO<sub>2</sub>
- Demonstration unit has shown promising results for rapid return on investment

# Outreach Goals

- Increase awareness of and participation in the Air District's Climate Tech Finance Program.
- Establish the Air District as a trusted resource for climate technologies and financing.

# Outreach Approach

## **Flexible to technology landscape and stakeholder needs**

- Engage diverse group of stakeholders
- Utilize activities to inform and engage stakeholders
- Provide clear, targeted information tailored for specific stakeholders
- Maintain climate technology review

# Stakeholders

## Facilities

*e.g. small businesses, municipalities, universities, hospitals, schools*

- Share suitable technology opportunities reduce greenhouse gas emissions
- Identify initial loan projects for “Climate Tech Finance” program

## Technology Companies

*e.g. energy storage, waste management, power generation, efficiency, heating, cooling, Internet of Things, AI*

- Share financing opportunities with technology companies

# Stakeholders (cont'd)

## Ecosystem Partners

*e.g. governments, regulatory and funding agencies, trade groups, incubators, accelerators, investors, banks, foundations, community stakeholders*

- Identify financing partners
- Encourage regulatory, policy, and funding action

# Outreach Channels

- Host quarterly events tailored to specific industrial sectors and to showcase technologies
- Sponsor and attend relevant conferences and events
- Provide targeted stakeholder briefings
- Promote via newsletters, webinars, partner websites
- Utilize social media

# Climate Tech Marketplace

## September 13, 2018

- Event for TIO to strengthen connections with technology, facility, local government, and industry accelerator partners
- Followed the Air District's Diesel Free by '33 signing ceremony by offering concrete solutions and partnerships
- Increased awareness about Air District grant and loan opportunities for mobile and stationary technologies

---

# Loan Program Agreement

Technology Implementation Office Steering Committee Meeting  
October 22, 2018

Derrick Tang  
Manager

# Climate Tech Finance Program Overview

Financing + Technology Evaluation

**Goal: Address critical barriers for facilities to implement new technologies**

**Barriers**

**Technology Implementation Office (TIO) Added Value**

<b>Awareness of technologies</b>	Identify new technologies and provide engineering review and project inspections
<b>Awareness of financing programs</b>	Identify new borrowers and provide technical assistance
<b>Availability and terms of financing</b>	Lower interest rates and cover initial fees

# Bay Area Air Quality Management District (Air District) - IBank Timeline

- Discussed and drafted agreement with IBank
- Air District Board has authorized the Air Pollution Control Officer (APCO) to execute the final agreement with IBank (August 1, 2018)
- IBank is currently reviewing the draft
- Once executed, the Air District-IBank collaboration will create an initial \$4M revolving loan and loan guarantee fund – Climate Tech Finance

# Climate Tech Finance Program

## \$4M initial TIO revolving loan fund

- Deployed at \$1-2M per year over next 3 years
- # projects/year: 5-10
- \$3M in loans and \$1M in loan guarantees

**Current programs**

**Climate Tech Finance**

*Loans for municipalities, universities, schools, hospitals*

- \$500K to \$30M
- Subsidized interest rates
- Up to 30 year terms
- Up to 25% of total loan
- Offer Air District funds at 0% interest
- Cover fees for first 8 loans (Air District portion)

*Loan guarantees for small businesses*

- Up to 80% guarantee
- Up to \$2.5M
- Up to additional 10% guarantee
- Cover fees for first 10 loan guarantees

# Program Guidelines

*Projects must meet these guidelines to be eligible for Air District financing:*

- Facility located in Bay Area
- Technology supported by Technology Assessment Matrix
  - Emerging technology (TRL 7-9)
  - Emissions reduction potential, economic viability
- Maximum Air District participation per project
  - \$1M in a single loan or \$250k in a single loan guarantee
- Air District funds are drawn down on project-by-project basis
- Air District portion of loan is repaid in 5 years or less

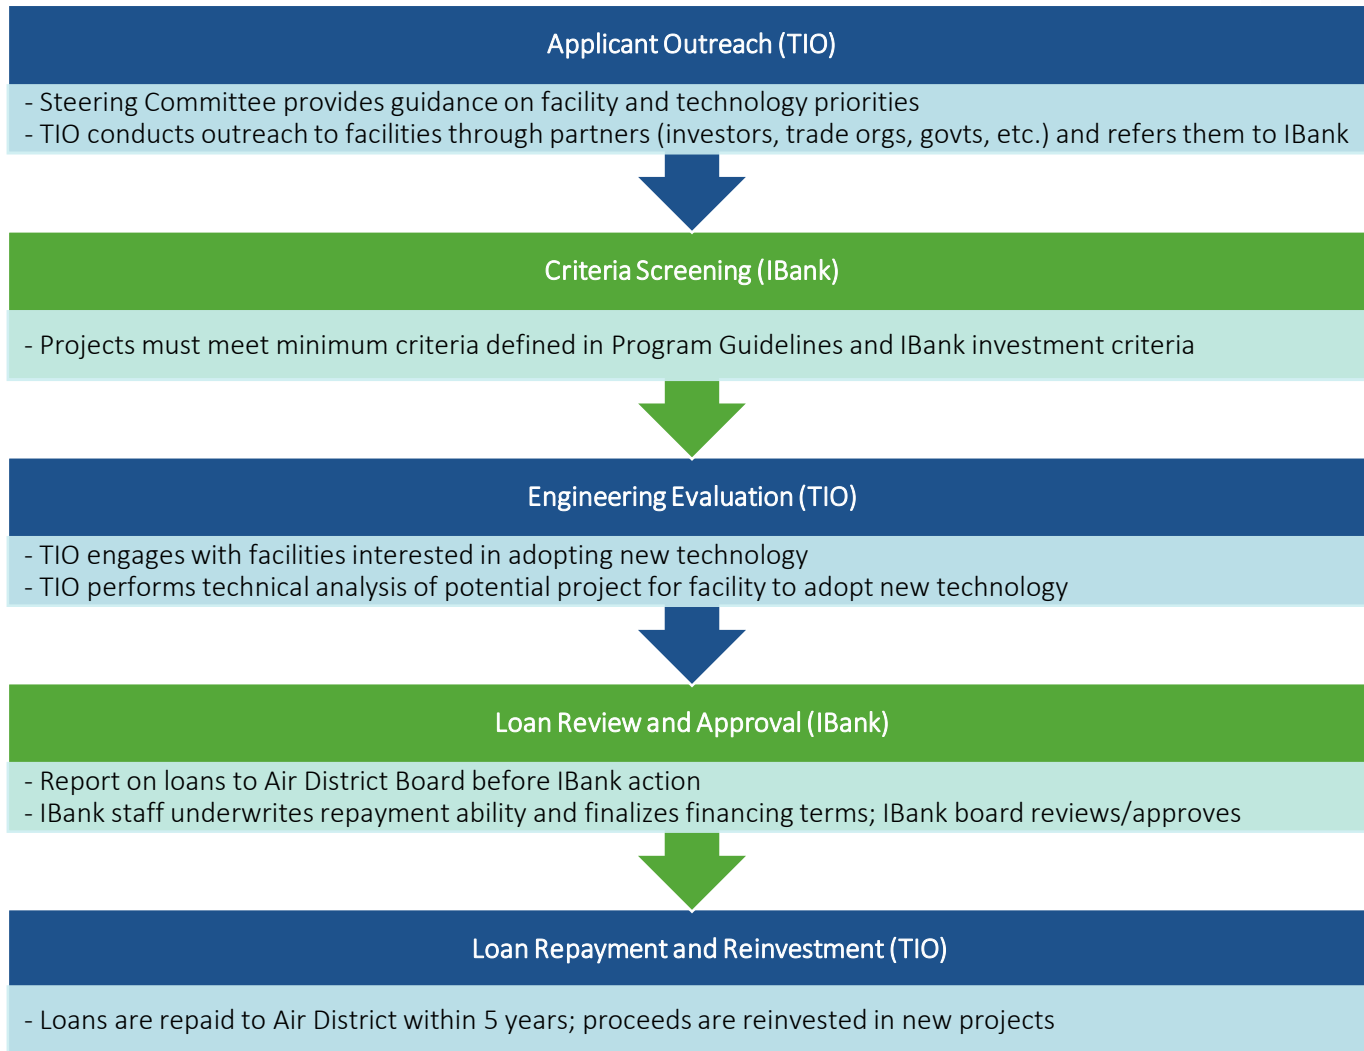

# Program Guidelines (cont'd)

## *Program Guidelines, continued:*

- Air District portion of losses in loans and loan guarantees are borne by the Air District
- Air District liability cannot exceed Air District's portion of loans and loan guarantees
- Air District may terminate program and remaining unallocated funds are not committed
- Mechanism to update Program Guidelines periodically
- Projects that do not meet Program Guidelines may still be eligible for other IBank programs

# Financing Process

# Long Term Goals

- Initial projects evaluated as pilots to inform future loan projects and update program guidelines
- Identify opportunities to expand collaborations with IBank
- Identify new financing partners and resources
- Evaluate alternative financing models

# Electric Vehicle Infrastructure and Fleet Incentive Programs

Technology Implementation Office Steering Committee Meeting  
October 22, 2018

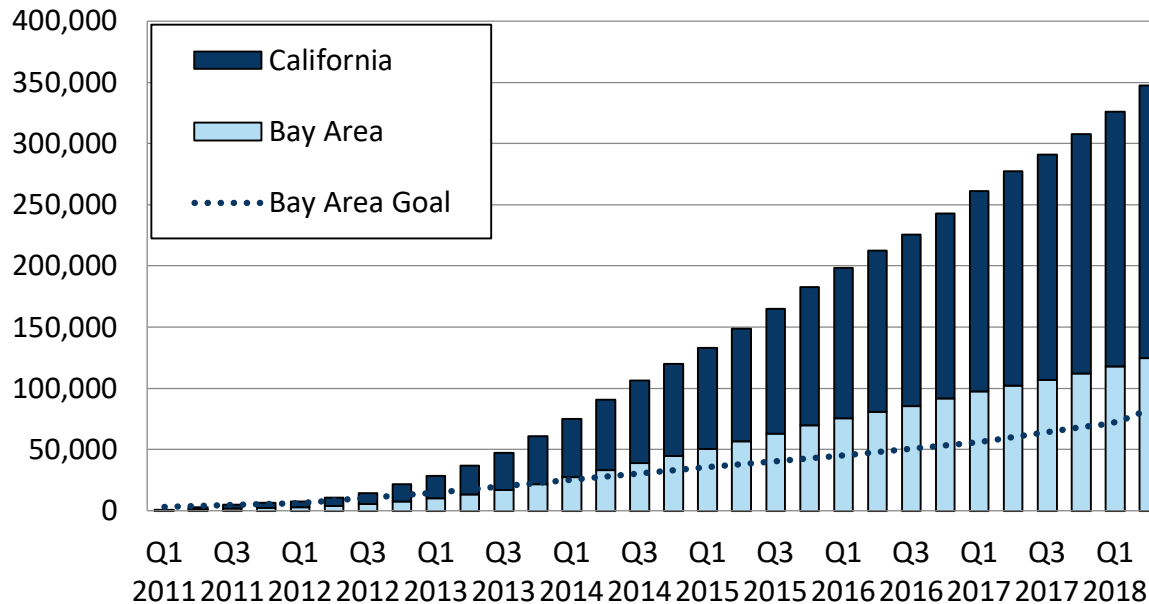

Mark Tang  
Staff Specialist

# Adoption of EVs in Bay Area and California

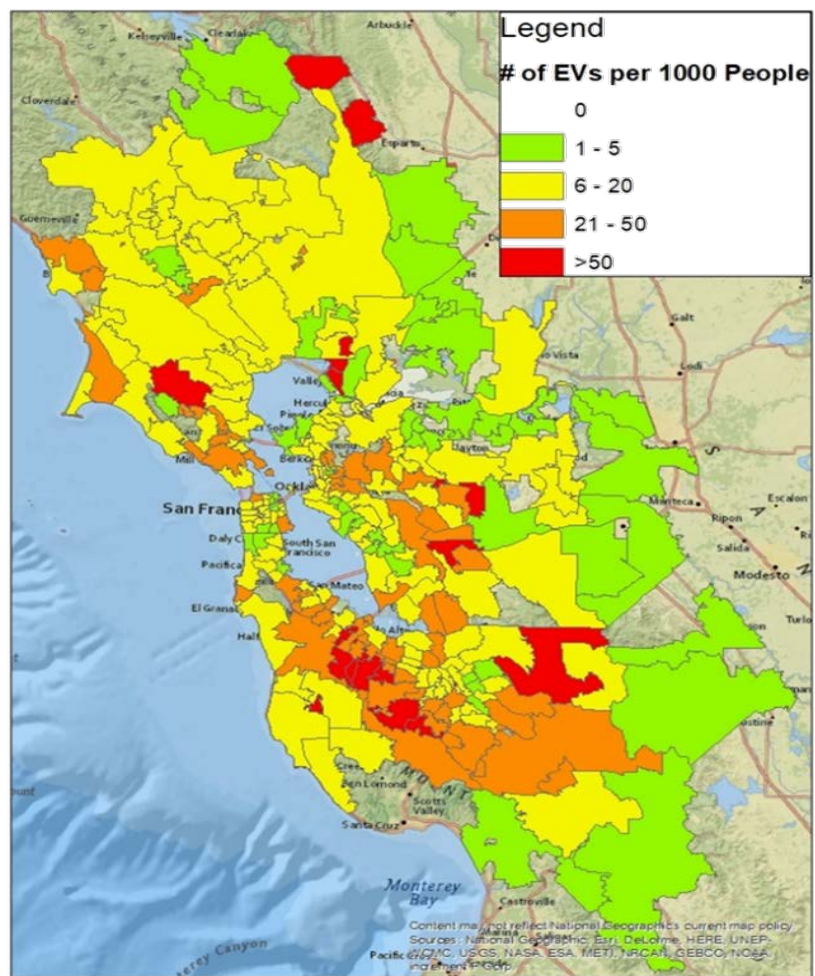

**Current Adoption:**  
**~125,000 EVs**  
**2% of Bay Area fleet**

**2017 Clean Air Plan**  
**EV Goal:**  
**90% of fleet by 2050**

Estimated from Clean Vehicle Rebate Program data

# Adoption of EVs in Bay Area

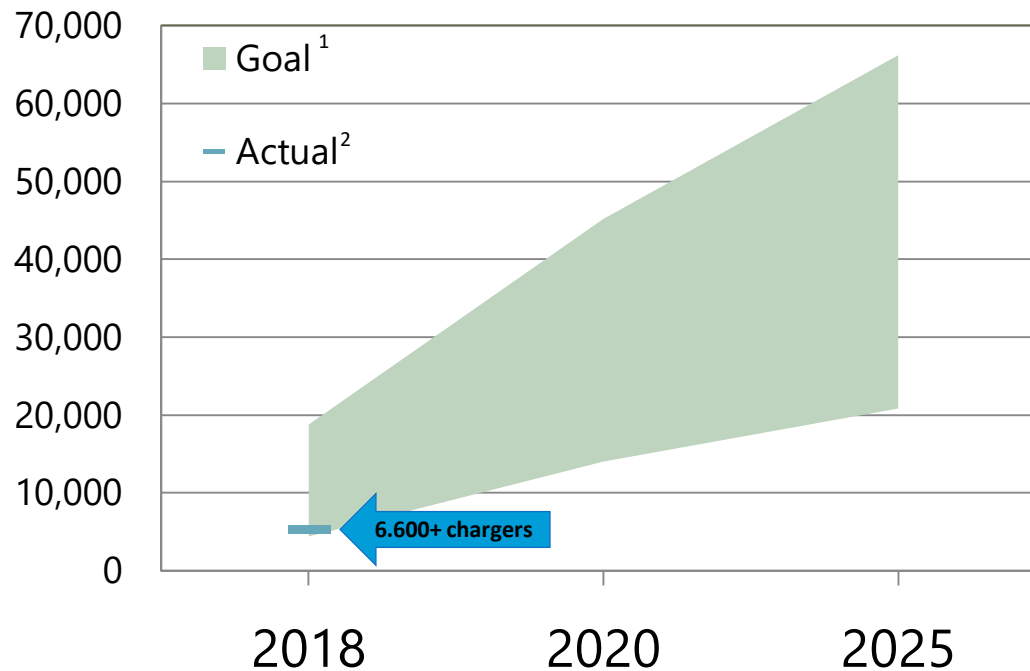

Department of Motor Vehicles data (2017)

# Current and Needed EV Charging Infrastructure

## Chargers

<sup>1</sup> Based on estimated demand for publicly-available Level 1 and 2 chargers using ICF and EPRI Method Estimates from the Bay Area PEV Readiness Plan: <http://www.baaqmd.gov/~media/files/strategic-incentives/ev-ready/bay-area-pev-readiness-plan-summary-2013-web-pdf.pdf?la=en>.

<sup>2</sup> Based on Department of Energy, Alternative Fuels Data Center. Retrieved October 14, 2018 from [https://www.afdc.energy.gov/stations/#/find/nearest?fuel=ELEC&ev\\_levels=2&ev\\_levels=dc\\_fast&ev\\_levels=1](https://www.afdc.energy.gov/stations/#/find/nearest?fuel=ELEC&ev_levels=2&ev_levels=dc_fast&ev_levels=1).

# Transportation Fund for Clean Air

- Authorized in 1991
- \$4 DMV surcharge to cost-effectively reduce tailpipe emissions
- ~ \$22 million available for Fiscal Year Ending (FYE) 2019

Trip Reduction

Clean Vehicle & Infrastructure

Bicycle Facilities

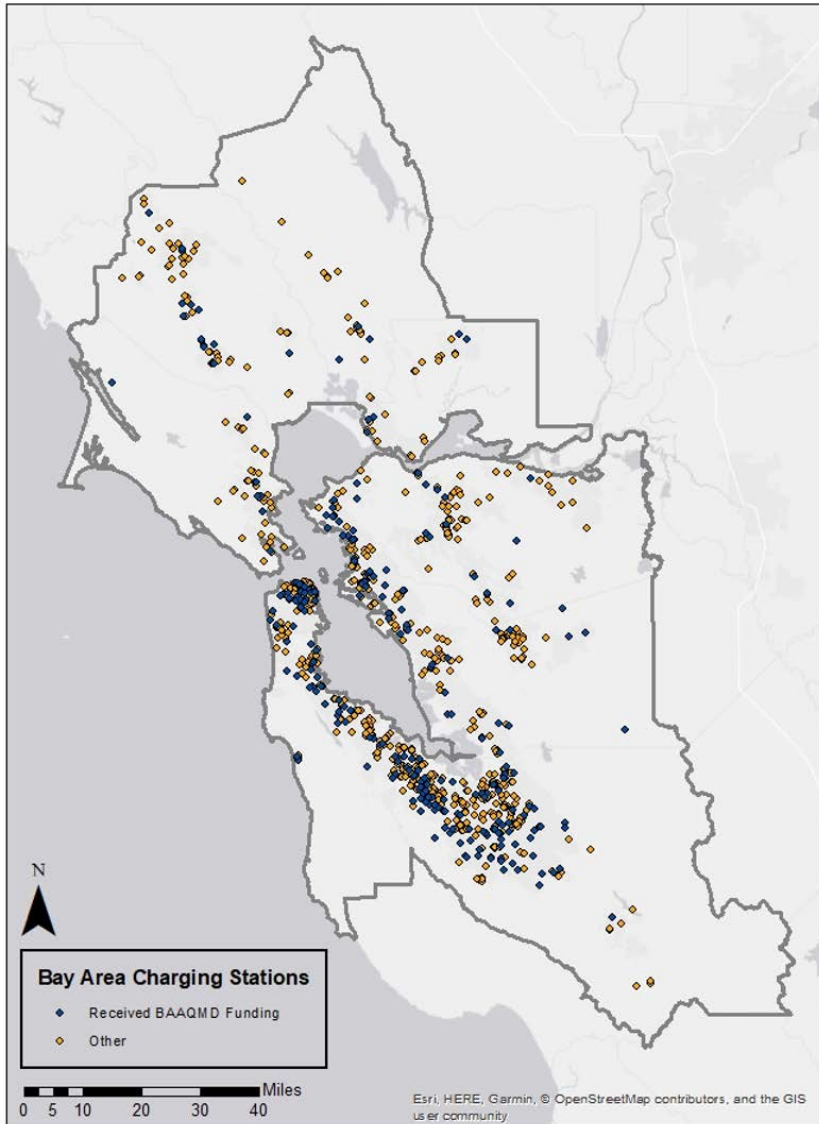

# Charge! Program

- Rapidly expand publicly accessible EV charging stations
- Transition Bay Area vehicles away from fossil fuels
- Grants to public and private organizations
- Additional funding (“plus-up”) to encourage clean energy production, multi-port charging stations and 24/7 DC Fast along transportation corridors

<http://www.baaqmd.gov/charge>

# Impact of Air District Funding on Bay Area Public Charging Stations

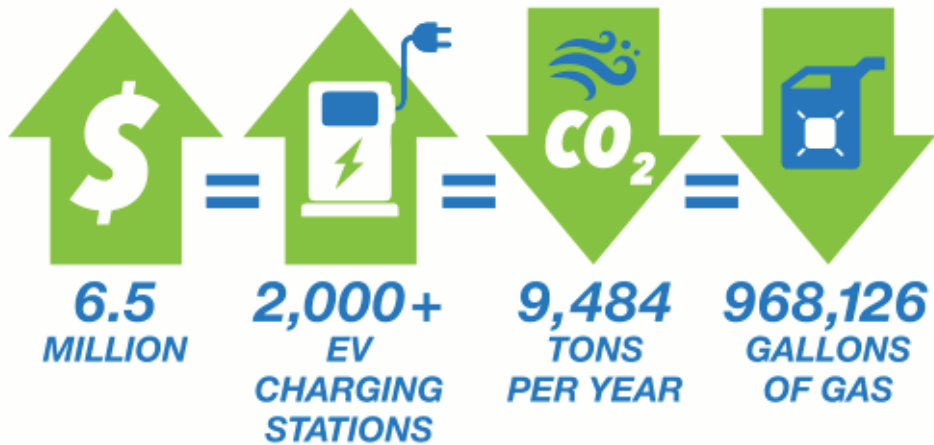

- 6,615+ Public Stations

36% Received Air District Funding (2013-2017)

# Charge! Program 2017 - 2018

## FACILITY TYPE

# Charge! Program FYE 2019

Level 1

\$750

Level 2

\$3,000

DC Fast

\$18,000

Solar

\$1/W up to  
\$4,000

Multi-port

\$1,000 per  
additional port

Transportation  
Corridor

\$7,000

Multi-dwelling  
Unit

\$4,000 per  
charger

Open October 25, 2018 – June 30, 2019

[www.baaqmd.gov/charge](http://www.baaqmd.gov/charge)

# Clean Fleets FYE 2019

\$1,000

Electric or Hydrogen  
Fuel Cell  
10 Vehicles minimum  
Purchase or lease

## Focusing on:

Ride-hail, Car-share  
Taxi & other TNC's

Municipal &  
Private fleets

Police & Parking  
Agencies

Open August 28, 2018 – January 31, 2019

[www.baaqmd.gov/cleanfleets](http://www.baaqmd.gov/cleanfleets)

# Outreach Activities

- Email notifications and social media
- Events
  - Ride and drives
  - Conferences and workshops
- Associations and newsletters
  - Multi-dwelling units
  - Fleet organizations
- Transportation Network Companies (TNC)
  - Ride-hail, car-share, pooling, shared mobility
- Car rental organizations
