Air District issues Spare the Air Smog Alert

Residents urged to find alternatives to driving alone

SAN FRANCISCO – Today, the Bay Area Air Quality Management District is issuing its third Spare the Air Alert for smog in 2017.

Air quality is forecast to be unhealthy tomorrow, Sunday, June 18. High pressure over Northern California is expected to produce near triple-digit temperatures inland. Offshore winds in the morning, switching to light onshore winds in the afternoon, will combine to create unhealthy ozone levels in parts of the East Bay and Santa Clara Valley. **There is no free transit tomorrow and there is no wood burning ban in place.**

“Hot temperatures and traffic exhaust are expected to cause hazy skies and unhealthy air quality in the Bay Area this weekend, said Jack Broadbent, executive officer of the Air District. “To reduce air pollution, try carpooling or taking transit to get around this weekend instead of driving alone.”

Spare the Air Alerts are called when ozone pollution is forecast to reach unhealthy levels. Ozone, or smog, can cause throat irritation, congestion, chest pain, trigger asthma, inflame the lining of the lungs and worsen bronchitis and emphysema. Long-term exposure to ozone can reduce lung function. Ozone pollution is particularly harmful for young children, seniors and those with respiratory and heart conditions.

When a *Spare the Air Alert* is called, outdoor exercise should be done only in the early morning hours when ozone concentrations are lower. Residents are encouraged to reduce air pollution every day by rethinking their commute and avoiding driving alone.

Find out more about what the Air District is doing to address climate change in the nine-county Bay Area. *Spare the Air-Cool the Climate* is a blueprint for tackling regional air pollution and climate pollutants while improving the health of Bay Area residents for the next several decades.
