Air District issues air quality advisory for Friday

SAN FRANCISCO – The Bay Area Air Quality Management District is issuing an air quality advisory for wildfire smoke for Friday, August 25.

Smoke from the Smith River Complex and other fires in Northern California is expected to impact air quality throughout the Bay Area on Friday, causing air quality to reach low-moderate on the U.S. EPA's Air Quality Index. Smoky, hazy skies may be visible and the smell of smoke is possible. **Pollutant levels are NOT expected to exceed the national 24-hour health standard and there is no Spare the Air Alert in effect.**

The Air District will be closely monitoring air quality throughout the region for smoke impacts from these fires.

If the smell of smoke is present, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside, if temperatures allow. It is also recommended that those impacted by smoke set their air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.
