BAY AREA AIR QUALITY MANAGEMENT DISTRICT

Data Form X Additional Data

375 Beale Street, Suite 600 . San Francisco, CA 94105 . (415) 749-4990 . Fax (415) 749-5030 Website: www.baaqmd.gov

for office use only
orm X is for additional information for an existing source $\underline{\text{only}}$. If your company has not previously submitted any information for is source, then do not complete Form X; use instead, the applicable Source Data Form(s) – C, G, S, T.
is source, then do not complete Form X, use instead, the applicable Source Data Form(s) – C, G, S, 1. (if unknown, leave blank)
1. Business Name: Plant No:
Source No.
2. Complete only one of the parts below. Check: Part 1 Part 2 Part 3 Part 4 Part 5
art 1 – COMBUSTION SOURCE – Information for an additional fuel not previously reported.
3. Fuel Code* 12-month fuel consumption - total usage units*
4. Typical percent of annual total: Dec-Feb% Mar-May% Jun-Aug% Sep-Nov%
5. Max. fuel use rate, usage units*/hr Typical heat content, BTU/usage unit*
6. Typical sulfur content, ppm for gaseous fuels,ppm or % wt for others%
7. Complete the Emission Factor Table at the end of this Form.
art 2 – GENERAL SOURCE – Information for an additional process material not previously reported.
8. Material Code* 12-month throughput, total usage units*
9. Typical percent of annual total: Dec-Feb% Mar-May% Jun-Aug% Sep-Nov%
10. Typical operating time:hours/daydays/weekweeks/year
11. Maximum operating rateusage units*/hr
12. Exhaust flowrateCFM at°F with approximate water vapor content%
13. Complete the Emission Factor Table at the end of this Form.
13. Complete the Emission Fable at the end of this Form.
art 3 – TANKAGE OR LOADING SOURCE – Information for an additional organic liquid not previously reported.
14. Material Code* 12-month throughputthousand gal or thousand bbl
15. True vapor pressurepsia or RVPpsia and typical liquid temperature°F
16. °API (if applicable): Initial boiling point °F
art 4 – SURFACE COATING OR PRINTING PRESS - Information for an additional coating not previously reported.
17. Material Code* for coating Total coating applied, previous 12 monthsgal
18. Is this coating a "complying" coating as defined in BAAQMD Regulation 8, Rule 4?
19. Percent solids, by volume% Percent solvent, by volume%
20. Of the total solvent in the coating, what percent evaporates at this source?%
21. Density of organic solventlb/gal
22. Composition of organic solvent:
a) largest component: percent of solvent%; Material Code*
b) 2nd largest component: percent of solvent%; Material Code*

Part 5 - OTHER SOLVENT EVAPOR For Solvent Cleaner Operation (tional solvent not pre	eviously reported.	
23. Material Code*	Net	Net solvent usage, previous 12 months			gal	
24. If solvent is heated, temperatu	re of solvent	°F	С	Density	lb/gal	
For Fiberglass Operations						
25. Type of resin			Total used, p	revious 12 months	g	gal
26. Type of catalyst			Total used, p	revious 12 months	g	gal
27. Percent styrene in resin			Percent of other volatiles		%	
For Solvent and Surface Coating	g Manufacturing C	perations				
28. Material Code* of manufacture	ed material					
29. Quantity manufactured, previo	us 12 months	1	thousand gal			
30. Type of solvent used for manu	facturing process,	Material Co	de*			
31. Solvent evaporated during ma	nufacturing, as perc	ent of mate	rial produced_	%		
Other Solvent Use						
32. Material Code*	Tota	al solvent us	ed, previous 1	12 months	 _gal	
33. Is solvent "complying" as defin	ed in BAAQMD Reg	julation 8?	☐ yes ☐ no)		
EMISSION FACTOR TABLE – 1	o be completed for			. 7		
	(lb/Usage		Basis Code*	*		
34. Particulate						
35. Organics						
36. Nitrogen Dioxide (as N0 ₂)						
37. Sulfur Dioxide						
38. Carbon Monoxide						
39. Other:						
40.	s apply to emissions	after abate	ment device(s	·).		
*See Material Code listing
