

BAY AREA  
AIR QUALITY  
MANAGEMENT  
DISTRICT

# PUBLIC NOTICE

June 10, 2009

TO: Parents or guardians of children enrolled at the following schools:

**Margaret Pauline Brown Elementary School  
Hope Lutheran Elementary School**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #19769 for the following source of air pollution:

**Dual Phase Extraction System  
Exxon Mobile Oil Corp.  
1690 Sullivan Avenue, Daly City CA 94015**

---

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing contamination problem, a Dual Phase Extraction and Treatment System has been proposed for this site. Underground storage tanks formerly located at the site leaked gasoline into the surrounding soil and contaminated both the soil and groundwater. The leaking tanks have since been removed from the site. Exxon Mobil Corporation, has proposed a system consisting of a vacuum pump to extract petroleum vapor and groundwater from well an existing monitoring well at the site. Treatment of the extracted vapor will be accomplished by Thermal/or a Catalytic Oxidizer or two carbon canisters in series. Treatment of the extracted groundwater will be in an enclosed system. The wastewater will be treated through two carbon beds and then pumped to a closed holding tank where it will be disposed offsite. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

939 Ellis Street • San Francisco 94109 • 415.771.6000 • [www.baaqmd.gov](http://www.baaqmd.gov)

**The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.**

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:

[http://www.baaqmd.gov/pmt/public\\_notices/index.htm](http://www.baaqmd.gov/pmt/public_notices/index.htm)

***PUBLIC COMMENT PERIOD***

**There is a 30-day period for public response to this proposal. If you wish to comment on the proposed project, you may do so in writing or by e-mail. Alternatively, you may call and leave a telephone message up to one minute in length. Please leave your name and telephone number so that a District staff member may respond to your message.**

Please use the following contact information if you would like to comment on the proposed project:
