

NOTICE INVITING WRITTEN PUBLIC COMMENTS

NOTICE is hereby given that the Air Pollution Control Officer of the Bay Area Air Quality Management District ("District") has made a preliminary decision to issue a Synthetic Minor Operating Permit to Google Inc., located at 1600 Amphitheater Parkway, Mountain View, CA 94043, as requested under application #24781. This facility operates two landfill gas fired internal combustion engines and twenty-five emergency standby diesel generator engines.

The proposed permit will impose practically-enforceable permit conditions that limit the facility's potential to emit carbon monoxide, nitrogen oxides, sulfur dioxide, precursor organic compounds, and particulate matter to 95 tons per year each, any single hazardous air pollutant to 9 tons per year, and aggregate hazardous air pollutant emissions to 23 tons per year. The permit will also limit the facility's potential to emit greenhouse gases to 90,000 tons per year on a CO₂-equivalent basis. By limiting the facility's potential to emit in this manner, the proposed permit will ensure that the facility remains exempt from the requirements of the Federal Operating Permit Program as codified in Title V of the Federal Clean Air Act Amendments of 1990 and implemented by the District through Regulation 2, Rule 6.

The Air Pollution Control Officer invites written public comment on the above application and intended action. Comments must be submitted by January 3, 2014.

The evaluation report with synthetic minor operating permit conditions and supporting materials are available for public inspection at the District Headquarters, 939 Ellis Street, San Francisco, CA 94109, in the Engineering Division on the 3rd floor. Written comments should be mailed to Dharam Singh at the BAAQMD, 939 Ellis Street, San Francisco CA 94109 or by e-mail to dsingh@baaqmd.gov.

Dated at San Francisco, the 14th day of **November**, 2013.

Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
Bay Area Air Quality Management District
