Mr. Greg Solomon
Senior Air Quality Engineer
Bay Area Air Quality Management District
939 Ellis Street
San Francisco, CA 94109

**Chevron Energy & Hydrogen Renewal Project
Renewal of Authority to Construct – District Regulation 2-1-407
Application No. 12842, Plant 10**

Dear Mr. Solomon:

Further to Chevron's August 17, 2011 meeting with you and other District staff concerning the request for renewal of the Authority to Construct (ATC) issued on September 19, 2008, the following additional information is being provided. This information provides additional documentation concerning "substantial use" for the Hydrogen Purity and Hydrogen Plant elements of Chevron's Hydrogen & Energy Renewal Project (Renewal Project).

- Liquid Oxygen Tanks: It was noted that these tanks were not on the previously submitted equipment list, but were observed to be present during your August 11, 2011 visit to the Refinery. These tanks were fabricated offsite by Air Products, delivered to the Refinery, and placed prior to the July 2009 shutdown of Renewal Project construction.
- Final Total Materials Cost for Each Project:
 - Hydrogen Plant: REDACTED – CONFIDENTIAL AND TRADE SECRET
 - Hydrogen Purity Improvements: REDACTED – CONFIDENTIAL AND TRADE SECRET
- Original ATC with Sources No Longer in the Project Identified: See the attached original ATC with the sources no longer in the project struck out.
- Wet ESP Purchase Date: Chevron has determined that May 14, 2007 was the date that prospective vendors were engaged to discuss Wet ESP options and performance capabilities since Chevron was anticipating the need to install this equipment to reduce particulate matter and sulfuric acid mist emissions to acceptable levels. The final purchase order was issued on July 31, 2008. Chevron cannot confirm an exact equipment delivery date. During the District's August 11, 2011 Refinery visit, you observed that the Wet ESPs are on site.

Mr. Greg Solomon
BAAQMD
September 13, 2011
Page 2

- Blanks in the Praxair Equipment List: The attached Praxair Equipment list has been updated to fill in the blanks (highlighted in yellow) that existed in Chevron's August 16, 2001 submittal to the District. While there are still a few blanks, the majority of the information is included. EQUIPMENT DESCRIPTIONS AND SHIPMENT DATES HAVE BEEN REDACTED – CONFIDENTIAL AND TRADE SECRET.

As set forth in District Regulation 2-1-407, pursuant to an environmental impact report that "explicitly covered a construction period longer than four years," the District issued the ATC on September 19, 2008. By letter dated September 15, 2010, Chevron requested that the ATC be renewed for an additional two year term. The District subsequently requested additional information by letter dated October 6, 2010. Chevron responded to that request by letter dated November 17, 2010. Chevron submitted additional information demonstrating "substantial use" on July 14 and August 16, 2011.

TRADE SECRET INFORMATION

Please note that much of the information included with this transmittal is confidential business information/trade secret. Chevron asserts that this information is trade secret pursuant to Section 6254.7 of the Government Code and District Rule 2-1-202.7 and is not public record as follows:

- The Praxair equipment costs, descriptions, and shipment dates contain engineering and design information of commercial value that could provide competitors with a business advantage.
- The Chevron cost information contains information of commercial value that could provide competitors with a business advantage.

The redacted, public version of the information is also being submitted to the District with this letter.

If you have any questions concerning the information provided in this submittal, please contact Bob Chamberlin at (510) 242-1466.

Sincerely,

Dave Feiglstok

Application Number: 12842
Plant Number: 10
Equipment Location:
Same as above

Dear Applicant:

SUBJECT: AUTHORITY TO CONSTRUCT

This is your Authority to Construct the following:

S-4449 Hydrogen Plant Train #1, 140 MM SCFD Hydrogen Produced maximum capacity

S-4450 Hydrogen Plant Train #2, 140 MM SCFD Hydrogen Produced maximum capacity

S-4451 Hydrogen Recovery Unit, 50 MM SCFD Hydrogen Recovered maximum capacity

S-4471 Hydrogen Plant Train #1 Reformer Furnace, 950 MMBtu/hr maximum firing rate higher heating value (HHV), equipped with Low-NOx Burners abated by A-0302 Hydrogen Plant Train #1 Selective Catalytic Reduction (SCR) [Vented to P-0302 Hydrogen Plant Train #1 Furnace Exhaust]

S-4472 Hydrogen Plant Train #2 Reformer Furnace, 950 MMBtu/hr maximum firing rate HHV, equipped with Low-NOx Burners abated by A-0303 Hydrogen Plant Train #2 SCR [Vented to P-0303 Hydrogen Plant Train #2 Furnace Exhaust]

S-4465 Hydrogen Plant Cooling Tower, 36,000 gal/min maximum capacity

S-6021/A-6021 Hydrogen Plant Flare, 1.6 MMBtu/hr Pilot maximum capacity HHV, [Vented to P-0305 Hydrogen Plant Flare Exhaust]

~~**S-4452 Continuous Catalyst Regeneration-Reformer, 71,300 BPD maximum capacity [Vented to P-0308-CRR Regeneration-Vent]**~~

~~**S-4477 Reformer Furnace #1, 201 MMBtu/hr maximum firing rate HHV, equipped with Low-NOx Burners abated by A-0309 SCR**~~

~~S-4478 Reformer Furnace #2, 402 MMBtu/hr maximum firing rate HHV equipped with Low-NOx Burners abated by A-0309 SCR~~

~~S-4479 Reformer Furnace #3, 201 MMBtu/hr maximum firing rate HHV equipped with Low-NOx Burners abated by A-0309 SCR~~

~~S-4480 Reformer Furnace #4, 201 MMBtu/hr maximum firing rate HHV equipped with Low-NOx Burners abated by A-0309 SCR~~

~~A-0309 SCR for CCRR Furnaces #1-#4 (S-4477, S-4478, S-4479, S-4480) [Vented to P-0309 Reformer Furnaces #1-#4 (S-4477, S-4478, S-4479, S-4480)]~~

~~S-4473 3rd Cogeneration Gas Turbine, 550 MMBtu/hr maximum firing rate HHV. Combined Gas Turbine and HRSG equipped with Duct Burners 860 MMBtu/hr firing rate (calendar day). Combined Gas Turbine and HRSG equipped with Duct Burners 840 MMBtu/hr maximum firing rate (annual average)~~

~~S-4474 3rd Cogeneration Heat Recovery Steam Generator (HRSG) equipped with Duct Burners, equipped with Low-NOx Burners 350 MMBtu/hr Duct Burner maximum firing rate HHV. Combined Gas Turbine and HRSG equipped with Duct Burners 860 MMBtu/hr firing rate (calendar day). Combined Gas Turbine and HRSG with Duct Burners 840 MMBtu/hr maximum firing rate (annual average)~~

~~A-74 SCR abating both 3rd Cogeneration Gas Turbine and Heat Recovery Steam Generator~~

~~A-75 Oxidation Catalyst abating both 3rd Cogeneration Gas Turbine and Heat Recovery Steam Generator [Vented to P-0306 3rd Cogeneration Gas Turbine/Heat Recovery Steam Generator]~~

~~S-4454 #6 H2S Plant, Recycle Amine Regenerator, 11 MMSCFD maximum capacity~~

~~S-4490 Sulfur Loading Rack, 157 LT/hr maximum capacity abated by A-0310 Sulfur Loading Rack Caustic Scrubber [Vented to P-0310 Sulfur Loading Rack Caustic Scrubber Exhaust]~~

~~A-4450 Acid Gas Scrubber (C-2440), 11 MMSCFD Acid Gas for abatement of: #3 H2S Plant (S-4433), #4 H2S Plant (S-4434), #5 H2S Plant (S-4435), Recycle Amine Regenerator (S-4454), and the #8 NH3-H2S Plant (S-4429) and #18 NH3-H2S Plant (S-4345)~~

~~S-4456 Fresh Amine Storage Tank, 70,000 gal maximum capacity~~

~~S-3227 Lean Amine Storage Tank, 130,000 gallon maximum capacity~~

~~S-3228 Caustic Storage Tank, 200,000 gallon maximum capacity~~

~~S-3229 Spent Caustic Storage Tank, 400,000 gallon maximum capacity~~

~~S-4436 F-2170 Stack Gas Heater No. 1 SRU, 31.9 MMBtu/hr maximum firing rate HHV [vented to P-0151 SRU Train #1 Exhaust]~~

~~S-4437 F-2270 Stack Gas Heater No. 2 SRU, 31.9 MMBtu/hr maximum firing rate HHV [Vented to P-0152 SRU Train #2 Exhaust]~~

Implied Conditions

In the absence of specific permit conditions to the contrary, the throughputs, fuel and material consumption, capacities, and hours of operation described in your permit application will be considered maximum allowable limits. A new permit will be required before any increase in these parameters, or change in raw material handled, may be made.

Expiration

In accordance with Regulation 2-1-407, this Authority to Construct expires two years from the date of issuance unless the authority to construct has been renewed.

Trade Secret

Unless you have already designated specifically identified materials in your permit application as trade secret, under the California Public Records Act, all data in your permit application, the permit itself and all permit conditions will be considered a matter of public record and may be disclosed to a third party. Please contact your permit reviewer immediately if you wish to amend your permit application submittals or to designate certain permit conditions as trade secret. Unless we hear from you within ten (10) calendar days of this letter, except for materials which have been previously designated as trade secret, you shall be deemed to have waived any claim of confidentiality with respect to all materials in the District's files relating to this permit application.

Right of Entry

The Air Pollution Control Officer of the Bay Area Air Quality Management District, the Chairman of the California Air Resources Board, the Regional Administrator of the Environmental Protection Agency, and/or their designees, upon presentation of credentials, shall be granted the right of entry to any premises on which an air pollution source is located for the purposes of:

- A. The inspection of the source
- B. The sampling of materials used at the source
- C. The conduct of an emissions source test
- D. The inspection of any records required by District rule or permit condition.

Correspondence

Please include you application number with any correspondence with the District. The District's regulations may be viewed online at www.baaqmd.gov If you have any questions on this matter, please call Gregory D Solomon, Senior Air Quality Engineer at (415) 749-4715.

Very truly yours,

Jack P. Broadbent
Executive Officer/APCO
