RE: Permit Application #29504 for the following source(s) of air pollution:

**Red Bay Coffee Company
Batch Coffee Roaster
3098 E 10th St.
Oakland CA 94601**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Red Bay Coffee Company has applied for a retroactive Permit to Operate a small coffee roaster fired by natural gas and abated by a chaff collector and afterburner unit to control smoke and odor emissions.
