AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

March 9, 2023

TO: Parents or guardians of children enrolled at the following school(s):

The Kings Academy

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #665893 for the following source of air pollution:

**Sub-Slab Depressurization/Vapor Intrusion Mitigation System
Avana Apartments
355 North Wolfe Rd, Sunnyvale, CA 94085**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Soil at this location is contaminated with various volatile organic compounds that presents a risk to the indoor air of the Avana Apartments. To mitigate the risk to indoor air, Terracon Consultants, on behalf of Avana Apartments, have proposed to install a Sub-Slab Depressurization/Vapor Intrusion Mitigation (SSD/VIMS) system on seven (7) buildings at the site. Each SSD/VIMS will consist of up to four (4) vacuum blowers that will vent vapor from beneath the building to emission points on the roof.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
