San Francisco, CA 94105

SUBJECT: TITLE V SEMI-ANNUAL JANUARY THROUGH JUNE 2024 AND  
TITLE V SECOND QUARTER 2024 COMBINED REPORT

Dear Mr. Gove:

Central Contra Costa Sanitary District (Plant No. A0907) operates its wastewater treatment facility under a Title V Major Facility Review Permit and a Bay Area Air Quality Management District Permit-to-Operate. The attached Title V Semi-Annual January through June 2024 and Title V Second Quarter 2024 Combined Report discusses the compliance performance of Central Contra Costa Sanitary District's permitted sources. It complies with the reporting requirements in the Title V Major Facility Review Permit and Bay Area Air Quality Management District Regulation 2, Rule 6 requirements.

If you have any questions concerning the information in this combined report, please contact Environmental and Regulatory Compliance Division Manager Lori Schectel at 925-229-7143 or [lschectel@centralsan.org](mailto:lschectel@centralsan.org).

Sincerely,

*Alan Weer*

Alan R. Weer, P.E.  
Plant Operations Division Manager

# 1 Introduction

---

## 1.1 Purpose

This document is a Title V Semi-Annual and Second Quarter Combined Report for the Central Contra Costa Sanitary District (Central San). This report covers the Title V compliance activities for the semi-annual period of January 1, 2024 through June 30, 2024, as well as the second quarter reporting requirements for April 1, 2024 through June 30, 2024.

Central San, Facility No. A0907, was issued a Major Facility Review Permit on January 28, 2000. A revision to the permit was issued on November 15, 2004, and a five-year renewal permit was issued on December 11, 2006. The second five-year renewal permit was issued on March 12, 2015 with a minor revision to the Title V permit issued on June 29, 2019. On August 28, 2019, Central San submitted its Major Facility Review Permit Renewal Application to the Bay Area Air Quality Management District (BAAQMD), which is awaiting processing. This semi-annual report is submitted to comply with the requirements of BAAQMD, Regulation 2, Rule 6 and Title V of the Clean Air Act.

Section 2 of this report contains Title V compliance activities for the auxiliary boilers, furnaces, gasoline dispensing facility, preliminary treatment, ash conveying system, cogeneration, and additional Title V activities.

Section 3 contains the quarterly reporting requirements of sulfur content of landfill gas (LFG) used in auxiliary boilers (S-7 and S-8), total organic carbon leak testing for the LFG system, and sulfur dioxide ( $\text{SO}_2$ ) emissions from both LFG and natural gas (NG) combustion.

## 1.2 Recordkeeping and Reporting

Records are maintained and available for inspection in accordance with BAAQMD Regulation 8-34-501.12. The primary location for records storage is Central San's internal network storage. Records are maintained at this location for a minimum of five years.

## 2 Title V Compliance Activities

---

The following sections summarize the compliance activities for January 1, 2024, through June 30, 2024.

### 2.1 Auxiliary Boilers No. 1 and No. 2 (S-7 and S-8)

Both auxiliary boilers (S-7 and S-8) were operated on NG and LFG during the reporting period. Neither boiler operated on fuel oil during the reporting period. The NG and LFG flow meters were operable, and the hourly data were collected and electronically archived. Neither boiler exceeded the 28 million British Thermal Unit (MMBTU)/Hour permit requirement for the reporting period.

When combusting LFG, the three-clock hour first-pass temperatures for both auxiliary boilers were above the minimum 770 degrees Fahrenheit (°F) permit limit 100 percent of the operating time during the reporting period (Appendix B). The next annual tune-up, insulation check, exhaust temperatures check, and emissions source test are tentatively scheduled for Fall 2024.

### 2.2 Furnaces No. 1 and No. 2 (S-9 and S-10)

Furnace No. 2 (S-10) began operation on January 9, 2024, and Furnace No. 1 (S-9) operated until January 12, 2024. During the current reporting period, solid fuel throughput to S-9 and S-10 did not exceed the daily combined limit of 120 dry tons/day, the daily limit of 60 dry tons/day per furnace, or the annual limit of 20,000 dry tons/365 days. Neither S-9 nor S-10 exceeded the hourly auxiliary fuel limit of 27 MMBTU/hour.

The temperature of Hearth No. 1 was above 1,000°F 100 percent of the time when S-9 or S-10 was firing on LFG. The wet scrubber pressure drop for S-9 and S-10 were above the minimum of 5.9 inches and 4.7 inches water column, respectively, 100 percent of the time during the reporting period (Appendix C).

The one-hour Hearth No. 2 oxygen (O<sub>2</sub>) levels for S-9 and S-10 were below the 10 percent O<sub>2</sub> reporting limit for 100 percent and 99.93 percent, respectively, during the reporting period (Appendix D). The opacity for S-9 and S-10 was below 20 percent for a period or periods aggregating more than three minutes in any hour for 100 percent of the time during the reporting period (Appendix E).

Sludge cake solids content is measured during all three work shifts each day. The volatile fraction of the cake solids is measured daily, and the volatile content varies slightly from day to day. The volatile solids content levels were below the 95 percent reporting limit for 100 percent of the reporting time (Appendix F).

Hearth temperatures lower than the following clock-hour minimums must be reported. The hearth temperature readings for S-9 and S-10 were above their minimum limits for 99.998 percent and 100 percent, respectively, of the reporting period. See Appendix G for a summary of hearth temperature exceedances.

### **Hearth Temperature Minimum Limits**

- Hearth No. 1: 1,000 °F
- Hearth No. 2: 800 °F
- Hearth No. 3: 1,000 °F
- Hearth No. 4: 1,000 °F
- Hearth No. 5: 1,000 °F
- Hearth No. 6: 1,000 °F
- Hearth No. 7: 100 °F
- Hearth No. 8: 100 °F
- Hearth No. 9: 80 °F
- Hearth No. 10: 40 °F
- Hearth No. 11: 40 °F

There were no inoperative monitor incidents during the reporting period for the following parametric monitors:

- Sludge flow monitor
- Scrubber pressure drop monitor
- Oxygen monitor
- Auxiliary fuel flow monitors
- Internal afterburner (Hearth No. 1) temperature monitor
- Hearth Nos. 2-11 temperature monitors

From January 31, 2024 to February 1, 2024, Montrose Air Quality Services, LLC conducted annual emissions testing on S-10 on behalf of Central San (NST-8967) for SO<sub>2</sub>, non-methane organic carbon, and pollutants regulated under Clean Air Act Section 129 (129) Sewage Sludge Incinerator (SSI) regulations. Emission results were below their respective limits and were submitted electronically to BAAQMD and the United States Environmental Protection Agency on March 19, 2024.

Effective March 21, 2016, Section 129 of the Clean Air Act (SSI Regulations) restricts the use of the furnace exhaust bypass damper while sewage sludge is in the combustion chamber (until the end of SSI residence time). Exercising the bypass damper during sewage sludge combustion is a Section 129 deviation because the unabated emissions from the bypass stack may exceed one or more of the 129 emission limits in Title 40 CFR, Subpart LLL, Section 62.15955. There were no bypass events in the reporting period.

The following sections summarize the Reportable Compliance Activities that were submitted to BAAQMD during the reporting period:

### **June 14, 2024, Furnace No. 2 Opacity Inoperative Monitor**

On June 14, 2024, Central San submitted RCA 200438 to report the inoperative opacity meter on S-10. During a routine quarterly audit on June 14, 2024, Air Science Technologies, Inc. completed the first low filter run and started the second run but stopped the audit due to major differences in the readings. While troubleshooting on June 25, 2024, it was discovered that Central San's opacity filters are defective. The opacity monitor was successfully audited on June 25, 2024, using a different set of opacity filters. The monitor was inoperative from June 15, 2024, at 09:50 to June 25, 2024, at 17:29. The opacity meter resumed normal operation at 17:30 on June 25, 2024.

## **2.3 Gasoline Dispensing Facility (S-25)**

S-25 passed the annual static pressure integrity test (ST-38) and the annual vapor recovery inspection on May 20, 2024. TEC Accutite conducted the ST-38 testing and noted no issues during the annual test. Fuel throughput for S-25 is recorded monthly. The gasoline dispensed for the past 12 months was approximately 409 gallons (Appendix H). This is considerably less than the limit of 400,000 gallons in any consecutive 12-month period.

## **2.4 Preliminary Treatment (S-110, A-23, and A-24)**

At all times malodorous compounds were present at the preliminary treatment (S-110) and emissions were abated by odor control scrubbers A-23 or A-24.

Central San is required to ensure that hydrogen sulfide ( $H_2S$ ) concentration in the stacks of A-23 and A-24 do not exceed 10.0 parts per million (ppm) by using a BAAQMD-approved device every calendar quarter. Quarterly  $H_2S$  monitoring results were below the  $H_2S$  limit and are summarized in Appendix I.

## **2.5 Ash Conveying System (S-182, A-186, A-191, A-192, and A-196)**

The ash conveying system (S-182) only operated while abated by baghouses A-186, A-196, or cyclone A-191 and baghouse A-192. All abatement devices were maintained according to manufacturer's specifications. The exhaust stacks from the particulate emissions abatement systems A-186, A-196, and A-191/A-192 were visually checked for leaks at a minimum of once per day.

## **2.6 Cogeneration (S-188)**

Cogeneration (S-188) fired only on Public Utilities Commission quality NG and did not exceed the permit fuel throughput limit of 1,188 MMBTU/day or 49.5 MMBTU/hour during the reporting period. All span and zero calibrations for the nitrogen oxides ( $NO_x$ ) continuous emissions monitor system were within their respective limits when the continuous emissions monitor system was in operation.  $NO_x$  emissions from S-188 did not exceed the following maximum limits:

- Three-clock hour average of 42 parts per million volumetric dry (ppmvd) at 15 percent  $O_2$
- Clock-hour average of 167 ppmvd at 15 percent  $O_2$
- 118 pounds of  $NO_x$  per any rolling consecutive 24-hour period
- 19.834 tons of  $NO_x$  per any rolling 365 consecutive day period

On March 18, 2024, Montrose Air Quality Services, LLC conducted a compliance source test (NST-9104) to demonstrate annual compliance with the carbon monoxide (CO) limits and results were submitted electronically to BAAQMD on April 15, 2024. The measured CO emissions demonstrated compliance with the following CO limits:

- 157 pounds per rolling 24-hour period
- 26.376 tons per rolling 365-day consecutive period

In March 2021, Central San replaced the CO catalyst element in-kind and conducted source testing for formaldehyde (per Permit-to-Operate Condition 21485, Part 9c) and CO (Notice of Source Test-6415). Central San returned to monthly CO monitoring per Permit-to-Operate Condition 21485, Part 9b, for 13 months, including the month of catalyst installation. CO monitoring continued on a quarterly basis thereafter since the estimated CO mass emissions were below 118 pounds/day on each monitoring day during the monthly monitoring. If CO emissions are estimated at more than 118 pounds/day on any day after starting quarterly monitoring, Central San must perform monitoring on a monthly basis until emissions are less than 118 pounds/day for three consecutive months. The estimated CO mass emissions were below 118 pounds/day on each monitoring day in the reporting period (Appendix J).

## 2.7 Sludge Loading Facility (S-197)

S-197 is a Sludge Loading Facility designed for operation if S-9 and S-10 are not available. It is an enclosed building with appropriate odor control (A-199) and is allowed 500 run hours annually for maintenance and testing. Operational hours include centrifuge to hopper loading, hopper storage, and hopper-to-truck loading. During the reporting period, S-197 was operated for 101.8 hours for testing and 0.0 hours while the furnaces were unavailable. Emissions were in compliance with the respective limits for H<sub>2</sub>S and organic compounds.

### **3 Second Quarter 2024 Reporting Requirements**

---

The following sections satisfy the second quarter reporting requirements pursuant to Permit-to-Operate Condition 21422, Part 2, Condition 21485, Part 8, BAAQMD 8-39-503, and BAAQMD 8-34-503.

#### **3.1 Sulfur Dioxide Concentration from Landfill Gas Combustion**

The maximum LFG H<sub>2</sub>S concentration was 44 parts per million by volume (during the second quarter period). Based on this H<sub>2</sub>S concentration, the estimated maximum exhaust gas SO<sub>2</sub> concentration from the auxiliary boilers and furnaces was 8.7 ppmvd. This concentration is significantly lower than the permit limit of 300 ppmvd. Quarterly SO<sub>2</sub> concentration readings from LFG combustion are included in Appendix K.

#### **3.2 Sulfur Dioxide Concentration from Natural Gas Combustion**

The maximum SO<sub>2</sub> emissions from the combustion of NG are based on the maximum total sulfur content of 0.24 grains total sulfur per 100 standard cubic feet from Pacific Gas and Electric, published “Rule 21 – Transportation of Natural Gas, Section C, Quality of Gas” for the second quarter of 2024.

While combusting NG, the maximum SO<sub>2</sub> concentration in the stack gas from the auxiliary boilers, furnaces, and cogeneration during the reporting period was 0.44 ppmvd SO<sub>2</sub>, which is well below the permit limit of 300 ppmvd SO<sub>2</sub>. Quarterly SO<sub>2</sub> concentration readings from NG combustion are included in Appendix K.

#### **3.3 Total Organic Carbon Leaks – Landfill Gas System**

The LFG piping from the landfill to Central San’s point of delivery was tested for leaks on June 27, 2024. There were no leaks in excess of the 1,000 parts per million by volume as methane limit in BAAQMD Regulation 8, Rule 34.

The LFG piping from Central San’s point of delivery to the permitted sources was tested for leaking components on May 23, 2024. There were no leaks in excess of the 1,000 parts per million by volume as methane limit in BAAQMD Regulation 8, Rule 34.

Quarterly total organic carbon leaks data are presented in Appendix L.

*I certify the following:*

***This completes the Title V reporting requirements for the semi-annual period of January 1, 2024, through June 30, 2024, as well as the second quarter period of April 1, 2024, through June 30, 2024. To the best of my knowledge, the information contained herein is true and accurate.***

*Alan Weer*

Date

## Appendix A

### Title V Semi-Annual Monitoring Verification Report

Date: July 29, 2024

Period: 1/1/2024-6/30/2024

Site #: A0907

Site Name: Central Contra Costa Sanitary District

Address: 5019 Imhoff Place

City: Martinez State: CA Zip Code: 94553

The following tables show the relationship between each limit and the associated compliance monitoring provisions, if any. Federally enforceable (FE) limits are also identified. The monitoring frequency column indicates whether periodic (P) or continuous (C) monitoring is required. For periodic monitoring, the frequency of the monitoring has also been shown using the following codes: annual (A), quarterly (Q), monthly (M), weekly (W), daily (D), or on an event basis (E). No monitoring (N) has been required if the current applicable rule or regulation does not require monitoring, and the operation is unlikely to deviate from the applicable limit based upon the nature of the operation.

*Permit Limit:*

10.0

**APPENDIX J**

Central Contra Costa Sanitary District, Plant No. A0907  
Cogeneration Carbon Monoxide Monitoring Summary  
January 1, 2024 through June 30, 2024

| Monitoring Date          | Quarter | Cogen NG Flow (kcfd) | CO Concentration (ppm) | O2 Concentration (%) | CO Mass Emissions (lb/day) |
|--------------------------|---------|----------------------|------------------------|----------------------|----------------------------|
| February 13, 2024        | Q1      | 932                  | 16.6                   | 16.7                 | 51.3                       |
| May 7, 2024              | Q2      | 980                  | 15.5                   | 16.5                 | 47.6                       |
| BAAQMD Monitoring Limit: |         |                      |                        |                      | 118.0                      |
| Permit Limit:            |         |                      |                        |                      | 157.0                      |

**Note:**

The CO catalyst on S-188 was replaced in-kind 3/17/2021, S-188 was operational 3/18/2021. Monthly monitoring was conducted for 13 months, including the month of catalyst installation. Per PTO Condition 21485(9b), CO monitoring continued on a quarterly basis thereafter since CO emissions were less than 118 lb/day for 12 consecutive months.

## **ELECTRONIC RECORD AND SIGNATURE DISCLOSURE**

From time to time, Carahsoft OBO Central Contra Costa Sanitary District (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign, Inc. (DocuSign) electronic signing system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to these terms and conditions, please confirm your agreement by clicking the 'I agree' button at the bottom of this document.

### **Getting paper copies**

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after signing session and, if you elect to create a DocuSign signer account, you may access them for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a \$0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

### **Withdrawing your consent**

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

### **Consequences of changing your mind**

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. To indicate to us that you are changing your mind, you must withdraw your consent using the DocuSign 'Withdraw Consent' form on the signing page of a DocuSign envelope instead of signing it. This will indicate to us that you have withdrawn your consent to receive required notices and disclosures electronically from us and you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

### **All notices and disclosures will be sent to you electronically**

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

## **How to contact Carahsoft OBO Central Contra Costa Sanitary District:**

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:

To contact us by email send messages to: [ataliani@centralsan.org](mailto:ataliani@centralsan.org)

## **To advise Carahsoft OBO Central Contra Costa Sanitary District of your new e-mail address**

To let us know of a change in your e-mail address where we should send notices and disclosures electronically to you, you must send an email message to us at [ataliani@centralsan.org](mailto:ataliani@centralsan.org) and in the body of such request you must state: your previous e-mail address, your new e-mail address. We do not require any other information from you to change your email address..

In addition, you must notify DocuSign, Inc. to arrange for your new email address to be reflected in your DocuSign account by following the process for changing e-mail in the DocuSign system.

## **To request paper copies from Carahsoft OBO Central Contra Costa Sanitary District**

To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an e-mail to [ataliani@centralsan.org](mailto:ataliani@centralsan.org) and in the body of such request you must state your e-mail address, full name, US Postal address, and telephone number. We will bill you for any fees at that time, if any.

## **To withdraw your consent with Carahsoft OBO Central Contra Costa Sanitary District**

To inform us that you no longer want to receive future notices and disclosures in electronic format you may:

- i. decline to sign a document from within your DocuSign session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;
- ii. send us an e-mail to [ataliani@centralsan.org](mailto:ataliani@centralsan.org) and in the body of such request you must state your e-mail, full name, US Postal Address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

## **Required hardware and software**

|                    |   |
|--------------------|---|
| Operating Systems: | Windows® 2000, Windows® XP, Windows Vista®; Mac OS® X   |
| Browsers:          | Final release versions of Internet Explorer® 6.0 or above (Windows only); Mozilla Firefox 2.0 or above (Windows and Mac); Safari™ 3.0 or above (Mac only) |
| PDF Reader:        | Acrobat® or similar software may be required to view and print PDF files  |

|                            |                           |
|----------------------------|---------------------------|
| Screen Resolution:         | 800 x 600 minimum         |
| Enabled Security Settings: | Allow per session cookies |

\*\* These minimum requirements are subject to change. If these requirements change, you will be asked to re-accept the disclosure. Pre-release (e.g. beta) versions of operating systems and browsers are not supported.

#### **Acknowledging your access and consent to receive materials electronically**

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please verify that you were able to read this electronic disclosure and that you also were able to print on paper or electronically save this page for your future reference and access or that you were able to e-mail this disclosure and consent to an address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format on the terms and conditions described above, please let us know by clicking the 'I agree' button below.

By checking the 'I agree' box, I confirm that:

- I can access and read this Electronic CONSENT TO ELECTRONIC RECEIPT OF ELECTRONIC RECORD AND SIGNATURE DISCLOSURES document; and
- I can print on paper the disclosure or save or send the disclosure to a place where I can print it, for future reference and access; and
- Until or unless I notify Carahsoft OBO Central Contra Costa Sanitary District as described above, I consent to receive from exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to me by Carahsoft OBO Central Contra Costa Sanitary District during the course of my relationship with you.
