SUBJECT: SEMI-ANNUAL MONITORING REPORT 2011 - FACILITY #1403

This report is intended to fulfill the semi annual monitoring requirements of the Major Facility Review Permit (MFRP) issued to facility #1403 for the period of July 1, 2011 to December 31, 2011.

Emissions from three digester/natural gas fueled internal combustion engines; S-29, S-31 AND S- 35 listed in Table VII-C of the MFRP are subject to the monitoring requirements. Since June 1, 1998 at least 2 of the 3 sources have been in continuous operation.

Emissions samples were taken for S-29, S-31 and S-35 on October 25, 2011. The sampling was performed by Blue Sky Environmental. BAAQMD personnel performed additional emissions tests for sources S-29 and S-31 on 11/7/2011 and 11/15/2011, respectively. In all these monitoring events emissions from these sources continue to remain significantly below the limits imposed by the District on the discharge of regulated air contaminants as listed in the MFRP.

✓ OS 4008 thru 4010

During the reporting period from July 1, 2011 through December 30, 2011 Facility #1403 has experienced no instances of non compliance with any of the applicable regulations, standards or limits as specified in the facility's MFRP. In that the present MFRP reached the term of the permit, the Major Facility Review Title V Renewal Application prepared by Brown and Caldwell with City Staff was submitted to the District on July 12, 2011.
