NOTICE is hereby given that the Executive Officer/Air Pollution Control Officer of the Bay Area Air Quality Management District invites interested persons to submit written comments on the proposed Renewal of the Major Facility Review Permit for the following facility:

Major facilities are required to obtain operating permits under Title V of the 1990 Clean Air Act Amendments, the Federal Operating Permit Program, and District Regulation 2, Rule 6 - Major Facility Review. The permits summarize all air-related requirements that apply to each source of emissions at each facility.

There have been no significant changes in emissions at this facility since the initial permit for this facility was issued on December 1, 2003. This proposed permit is the first renewal of the initial permit. A description of any subsequent revisions to the permit can be found in Section X of the permit entitled "Revision History". All proposed changes to the current permit are shown in strikeout/underline format.

The Air Pollution Control Officer invites written comment on the proposed renewal Title V permit for the facility listed above. Comments must be received by December 3, 2012. Any interested person may also request a public hearing for this permit.

Major Facility Review Permits are also subject to review and approval by US EPA. If US EPA has not objected to a proposed permit and District has not addressed a public comment in a satisfactory manner, the public may petition US EPA, Region 9, Operating Permits Section at 75 Hawthorne Street, San Francisco, CA 94105, within 60 days after the end of the 45-day US EPA review period, to reconsider the decision to not object to the permit. The beginning and end of the EPA review period can be found on the EPA Region 9 website at:
