

## NOTICE INVITING WRITTEN PUBLIC COMMENTS

**NOTICE** is hereby given that the Air Pollution Control Officer of the Bay Area Air Quality Management District has made a preliminary decision to issue a Synthetic Minor Operating Permit to the City of Santa Clara, located at 5401 Lafayette, Santa Clara, as requested under application #16697. This facility is a closed Class III municipal waste disposal site.

The proposed permit will impose federally-enforceable permit conditions that limit the facility's potential to emit to 95 tons per year each of nitrogen oxides, volatile organic compounds, carbon monoxide, sulfur dioxide, and particulate matter (PM10) and 90,000 tons per year of greenhouse gases on a carbon dioxide equivalent basis. By limiting the facility's potential to emit, the proposed permit will ensure that the facility remains exempt from the requirements of the Federal Operating Permit Program as codified in Title V of the Federal Clean Air Act Amendments of 1990.

The Air Pollution Control Officer invites written public comment on the above application and intended action within 30 days from the date of this publication.

A summary of the application is available for public inspection at the District Headquarters, 939 Ellis Street, San Francisco, CA 94109, in the Engineering Division on the 3<sup>rd</sup> floor. Written comments should be mailed to Catherine S. Fortney at the BAAQMD, 939 Ellis Street, San Francisco CA 94109 or by e-mail to [cfortney@baaqmd.gov](mailto:cfortney@baaqmd.gov).

Dated at San Francisco, the 19<sup>th</sup> day of July, 2011.

**Jack P. Broadbent**  
**Executive Officer/Air Pollution Control Officer**  
**Bay Area Air Quality Management District**
