

# Center for Community Energy and Environmental Justice

**SDSU**

Center for  
Community  
Energy and  
Environmental  
Justice

We are pleased to announce the launch of the **Center for Community Energy and Environmental Justice (CCEEJ)**. This new EPA and DOE-funded Thriving Community Technical Assistance Center based at San Diego State University, is committed to providing technical assistance, training, and related support to communities with environmental or energy justice concerns.

## Services CCEEJ can provide:

Conducting environmental and energy justice needs assessment and analyses

Increasing grant-getting and administration capacity

Facilitating navigation of government systems

Supporting decision-making participation

Identifying grant opportunities

Training community champions

Our comprehensive network has decades of experience providing technical assistance and is ready to work with your organization to develop an individualized plan of action to leverage your organization's existing assets and identify opportunities to expand capacity. This includes a strategic funding plan and support in navigating federal websites like SAM.gov and grants.gov.

CCEEJ has particular expertise in energy, environmental health and quality, community health, and supporting Tribal and Indigenous communities.

Environmental  
Justice

## What is Environmental Justice?

Environmental justice is the fair treatment and meaningful involvement of all people with respect to the development, implementation, and enforcement of environmental legislation and policies.

Environmental justice efforts ensure that all communities have:

- equitable protection from environmental and health hazards
- equal access to the decision-making process to have a healthy environment.

## What is Energy Justice?

Energy justice refers to the equity, affordability, accessibility and participation in the energy system and energy transition for all. Energy justice efforts are aimed at:

- reducing energy costs and burdens on low-income customers,
- avoiding disproportionate impacts and ensuring the equitable distribution of the benefits of energy generation, transmission and transition,
- access to reliable and clean energy,
- participation for communities in energy sector decision-making and development.
