

Appendix G – Map of Recommended Search Areas for Enhanced Air Monitoring in Refinery Communities

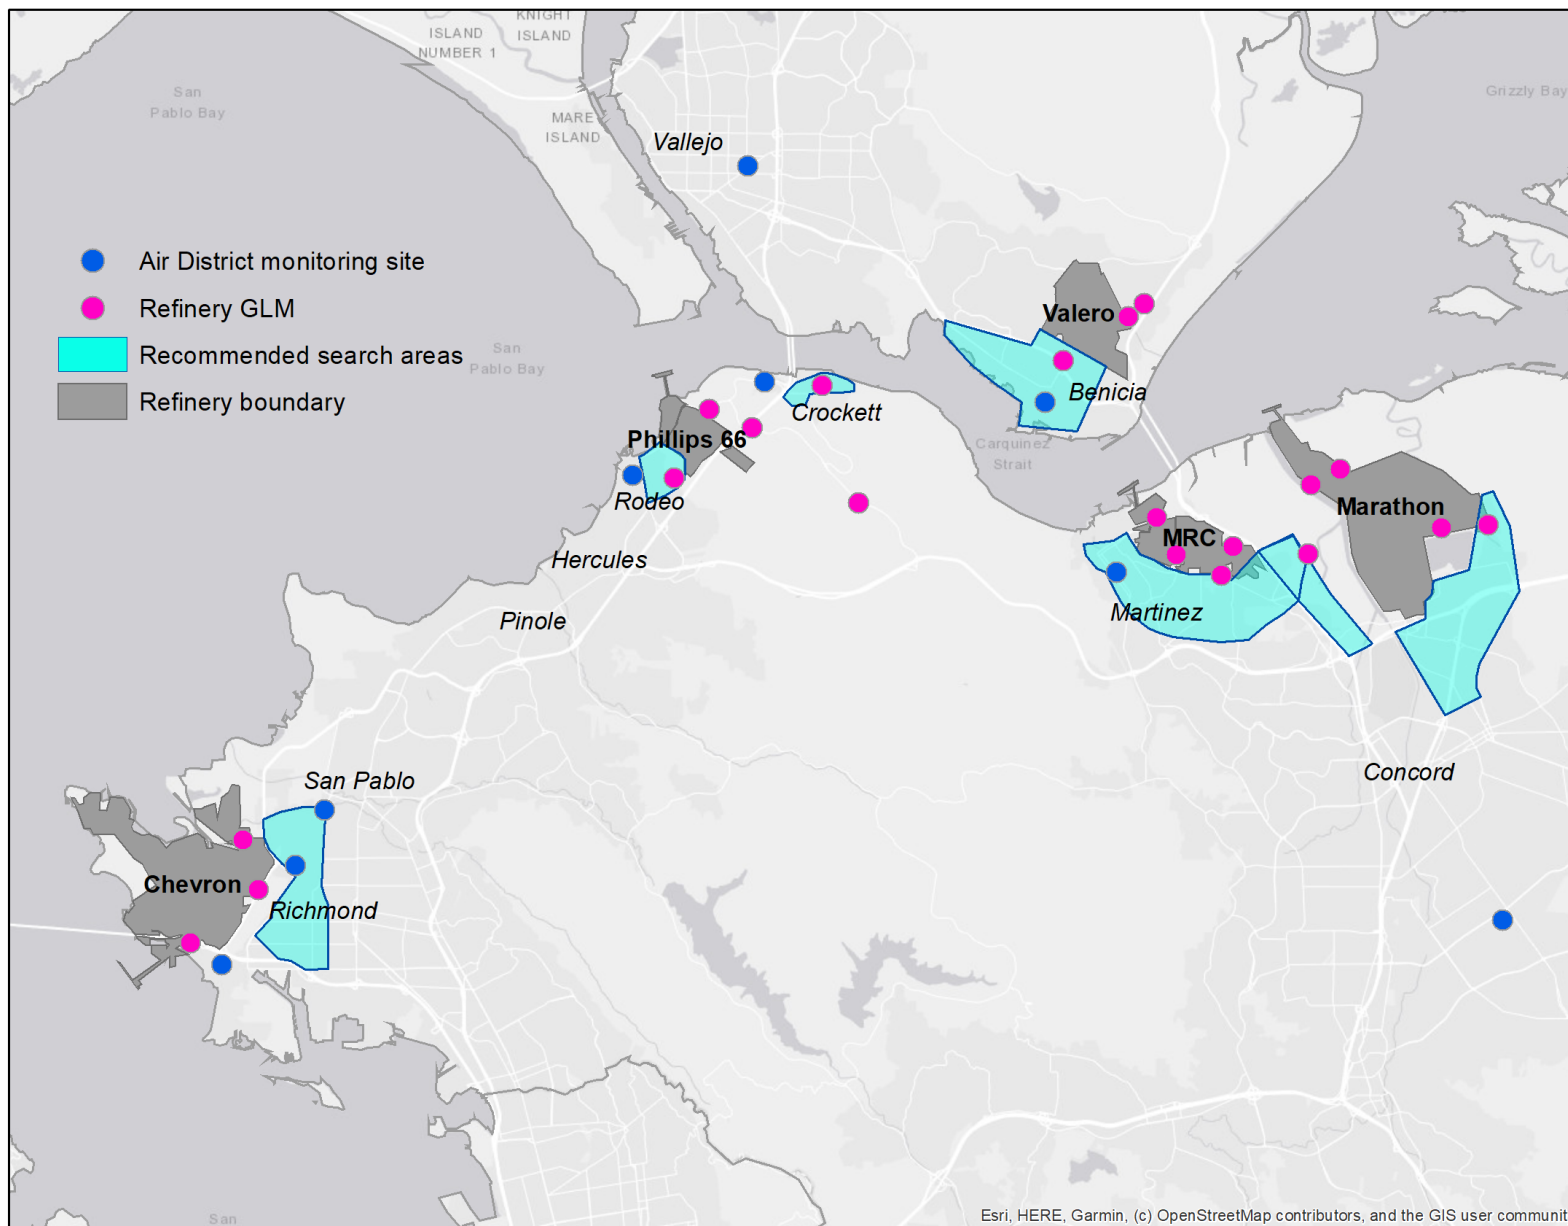

Figure G-1. Map of recommended search areas for enhanced air monitoring in refinery communities as part of the Major Stationary Source Community Air Monitoring Program and locations of existing Air District monitoring sites and refinery Ground Level Monitors (GLMs). The Air District monitoring site in Benicia is the new community air monitoring site under the Major Stationary Source Community Air Monitoring Program for the Valero Refinery area and began operations in summer 2024. The addition of enhanced air monitoring is pending for the Chevron, Phillips 66, MRC, and Marathon refinery areas.
